PROFILE

I'm a developer with 5 years of experience specializing in full-stack development. I thrive in remote work environments and have successfully delivered projects for clients in the US, Canada, and Mexico. My expertise lies in building scalable web and mobile applications using modern technologies like React, Node.js, and Ruby on Rails. I'm passionate about continuous learning and always eager to tackle new challenges.

EDUCATION

Information and Communication Technologies
Universidad Tecnológica de Ciudad Juárez | 2017

TECHNICAL SKILLS

React JS | React Native | Node.js | Next.js | Ionic | PostgreSQL | Redux | TypeScript | Ruby on Rails | Hotwire

SOFT SKILLS

Teamwork | Communication Skills | Problem-Solving Skills | Continuous Learning

FREELANCE PROJECTS

- **IQKitchen**: HACCP app in React Native (expo). Developed features to ensure food safety compliance, improving process effi. by 60%.
- **Solar**: Invoice portal with Node.js.
- **PideDirecto**: Food Delivery WebApp with React. Enhanced user experience, leading to a 15% increase in order completion rates.

WORK EXPERIENCE

Mind (micheldada/arkusnexus)

Ruby on Rails Developer | 2021 – Current

- **Notary**: Developed a web application for a notary company, enabling users to upload and verify payment proofs via OCR. This improved document processing efficiency by 40%.
- **Tigo Money**: Enhanced backend services for transfers and payments across five LATAM countries, implementing a QR payment feature that increased transaction speed and security.
- **Fixle**: Built a REST API from scratch with passwordless authentication and developed an admin panel. Implemented web scraping to gather appliance data, streamlining database management.

Hipergas

Software Developer | 2019 – 2021

- **Invoice Portal**: Web application created with React.js in the front and an API with Rails for the backend. This application was connected by webhooks to the ERP Business Central, also using AI language to create extensions.
- **Gas Sales App**: Developed an app to manage client orders and dispatch them to the call center. Built with React Native (CLI) and an API created with Rails.

Delphi Technologies

IT/Developer | 2017 – 2019

- Worked as IT coordinator and software developer, creating desktop and web apps for production tasks.
- Created and controlled inventory management systems using C#, MSSQL databases, and DevExpress framework.
- Managed IT department with vendors, and handled helpdesk support.

TECHNOLOGIES

- **Languages**: JavaScript, TypeScript, Ruby, SQL
- **Frameworks**: React, Next.js, Node.js, Ruby on Rails, React Native, Ionic
- **Databases**: PostgreSQL, MySQL
- **Tools and Platforms**: Redux, Git, Docker, AWS, Webpack
